Teaching Material Produced

- 2015 *Understanding Statistics in the Behavioral Sciences, 11th Edition.* R.R. Pagano & M.E. Pagano, Wadsworths, Cengage Learning, Belmont, CA. 640 pgs.
This is the 11th edition of one of the most popular introductory statistic textbook for students in psychology or other social sciences. I was responsible for editing the chapters on on inferential statistics and empirically derived sampling distributions, and expanding SPSS content to allow students to practice on problems specific to the textbook material.
- 2012 *A Practical Guide for Empirical Writing*, student-led research projects in Addiction Psychiatry, Child Psychiatry, Capstone Projects, Master Thesis, and Doctoral Dissertations.
Developed a series of training tutorials to aid students in completing a research project component of their training (i.e. medical school research block, Capstone Project, research component in fulfillment of ACGME-accreditation for residency programs, Master Thesis, Doctoral Dissertation). Tutorials include how to: 1) conduct, critique, and organize an effective literature review; 2) determine authorship; 3) structure each section of a manuscript; and 4) present original research in a poster presentation.
- 2010 *Stressful Life Events and Alcohol Relapse*, Alcohol Medical Scholars Program
Developed lecture and downloadable slides (see alcoholmedicalschoalrs.org) on the influence of stress on alcohol relapse to enhance education on alcohol in medical schools.
- 2007 *Helping Behaviors and Alcohol Use Disorders*, Alcohol Medical Scholars Program
Developed lecture and downloadable slides (see alcoholmedicalschoalrs.org) on the role of service in recovery from alcoholism to enhance education on alcohol in medical schools. Ranked in top 3 of lectures downloaded from alcoholmedicalschoalrs.org website.

Teaching Administration

- 2008-present Research Training Director, Addiction Psychiatry Residency Program, CWRU SOM.

- 2001-2005 Training Faculty, Center for Alcohol & Addiction Studies, Brown University SOM.

RESEARCH SUPPORT

Independent Scientist

“Character Development Through Service and Reduced Recidivism”, Templeton Trust Foundation, PI Maria Pagano, Ph.D., 2013-2017, \$1,271,585. This is a competing continuation investigation that continues to follow juvenile offenders (N=195) over the 24 months after treatment discharge.

“Helping Others and Long-Term Outcomes Among Adolescents”, PI Maria Pagano, Ph.D., Templeton Foundation. 2009-2013, \$1,009,036. This project develops a brief assessment of AA-related helping among adolescent populations with addiction and examines the impact of service participation on adolescent treatment response.

“Faculty Bridge Research Award”, PI Maria Pagano, Ph.D., CWRU School of Medicine, 2012-2013, \$50,000. This award sponsors critical research programs of CWRU faculty.

“Adolescent Service Participation Planning Grant”, Institute for Unlimited Love, PI Maria Pagano, Ph.D., 2008-2010, \$15,000. This project collects preliminary data on youth 12-step participation for planning of stage-III study in real-world setting of addiction treatment.

Maria Elizabeth Pagano – VITA

“Influences on Adolescent Addiction Treatment”, CWRU Support of Undergraduate Research & Creative Endeavors, Summer Research Fellowship for Paige Veta, Sponsor Maria Pagano, Ph.D., 2012-2013, \$3,500. Data drawn from Dr. Pagano’s followed sample of adolescents with addiction (N=195).

“Narcissistic Behaviors and Addiction”, CWRU Support of Undergraduate Research & Creative Endeavors, Summer Undergraduate Research Fellowship for Rebecca Carter, Sponsor Maria Pagano, Ph.D., 2010-2011, \$3,500. Data drawn from Dr. Pagano’s followed sample of adults with addiction (N=67). Outstanding Capstone award.

“Prosocial behaviors of Alcoholics with Bipolar 1 Disorder”, PI Maria Pagano, Ph.D., CWRU Department of Psychiatry Clinical Neuroscience Research and Education Foundation Board, 2006-2007, \$20,000. This Junior Faculty Pilot Research Fund Award sponsors critical research programs of Department Faculty.

“Service to Others and Long-term Outcomes”, NIAAA, PI Maria Pagano, Ph.D., 2005-2011, \$576,054. This K01 career development award develops a brief assessment of AA-related helping among adults in addiction recovery.

“Helping others and Long-term Outcomes”, PI Maria Pagano, Ph.D., Brown University School of Medicine, 2002-2003, \$4,000. This investigation examines the impact of service on post-treatment outcomes in Project MATCH.

Team Scientist

“Longitudinal Assessment of Mania Symptoms in Children”, PI Robert Findling, NIMH, 2005-2010, \$2,825,572. This R01 is a multi-site, longitudinal, prospective investigation of pediatric bipolar disorder and mania symptoms.

Role: Senior Statistician Maria Pagano, Ph.D

Achievements: led design of randomization schema for selection of comparison subjects that insured similarity of socio-demographics of control subjects and children with elevated symptoms of mania and allowed the development of subject specific weights; developed software program for consistency design structure of longitudinal datasets and variables collected over time (program adopted for subsequent trials); conducted analyses of baseline data for initial methods paper.

“Addiction Research Interest Group Proposal”, PI Alan Levine, CWRU SOM, 2011-2012, \$100,000.

This project coordinates clinical and basic science research on addiction and infection diseases through provision of core support facilities, short-term developmental funds, seminar series, and community based education programs.

Role: Co-Investigator Maria Pagano, Ph.D

Achievements: wrote scientific sections of the FY11 Interdisciplinary Alliance Investment Grant proposal, organized campus-wide directory of CWRU scholars conducting research with addiction populations.

“Measurement of Nicotine Dependence Among Youth Cigarillo Users”, PI Susan Flocke, NCI, 2015-2019, \$2,342,020. This R01 develops a comprehensive assessment of nicotine dependency to include cigars among adolescents.

Role: Co-Investigator Maria Pagano, Ph.D

Achievements: wrote power analysis section of awarded grant, led sampling design of project, demonstrated construct validity of developed instrument in relation to biomarkers.

“Self-Assessment Intervention for Young Adult Poly-Drug Users”, PI Steven Kurtz, NIDA, 2012-2017, \$2,188,550. This R01 is a randomized, control trial (RCT) of the effect of a self-assessment intervention on outcomes over time.

Role: Co-Investigator Maria Pagano, Ph.D

Achievements: performed hierarchical modeling to determine the efficacy of the interviewer-administered intervention versus the self-administered and control conditions on primary and secondary outcomes of the trial. Moderate effects detected resulted in driving the project forward to consider the influence of alcohol and drug consumption patterns of social networks. The influence of social networks on sobriety is well-studied in 12-step research but has been slow to transfer into the field of infectious disease.

“Double-Blind Comparison of Fluoxetine vs. Placebo in Depressed Youth with Substance Use Disorders“, PI Robert Findling, American Foundation for Suicide Prevention, 1999-2007, \$293,601.

This is a multi-site, RCT that examines the effectiveness of fluoxetine among depressed youths with addiction.

Role: Senior Statistician Maria Pagano, Ph.D.

Achievements: conducted interim analysis that influence the direction of the trial (stopped due to no differences between trial conditions); responsible for producing efficacy analyses and subgroup analyses; wrote methods and results sections of 3 publications and 2 national presentations; identified mediators

(severity of depression, amount of alcohol consumption) of effectiveness of fluoxetine versus placebo via creative use of mixture models. 2012 Ohio Psychiatric Physicians Association Medical Research Award.

“Office-Based Buprenorphine/Naloxone Maintenance Therapy for Heroin Dependent Patients”, PI Theodore Parran, Veterans Administration Medical Center of Cleveland, 2005-2007, \$100,000.

Role: Senior Statistician Maria Pagano, Ph.D.

Achievements: Performed intent-to-treat analyses showing moderate effects of buprenorphine/naloxone on long-term outcomes; constructed logistic regression models to evaluate if missing data violated assumptions of missing completely at random; produced results sections of 2 publications and 1 national presentation that received Best Medical Abstract Award from the American Society of Addiction Medicine.

“Mechanisms and Moderators of Behavior Change in Alcoholics Anonymous”, PI John Kelly, Ph.D., NIAAA, 2010-2012, \$391,359. This is a secondary data analysis project to study longitudinally the mechanisms responsible for Alcoholics Anonymous (AA) and moderators of the effects of AA.

Role: Senior Statistician Maria Pagano, Ph.D.

Achievements: applied mathematical methods to alcohol outcomes and wrote results sections of 6 publications and 4 national presentations; conducted propensity score analysis and multiple imputation methods to account for attrition bias to produce robust effects of AA-specific mechanisms (i.e. spirituality) on long-term outcomes; conducted time-varying analyses that advanced understanding of three moderating conditions of the effects of AA (social phobia, social network characteristics, smoker status).

“Collaborative Longitudinal Study of Personality Disorders”, PI Tracie Shea, NIMH, 2001-2006, \$2,106,516. This R01 is a multi-site, longitudinal investigation of the reliability and stability of four personality disorders (PDs).

Role: Senior Statistician Maria Pagano, Ph.D.

Achievements: wrote analytic plan sections of awarded continuing grant; conducted hierarchical modeling for 16 original articles and 4 national presentations; examined the association between within-subject trait stability and functioning with creative use of advanced technologies; results altered PD diagnostic standards to hybrid approach based on specific patterns of impaired functioning (Section III, DSM-5).

“The Harvard Brown Anxiety Disorder Research Program”, PI Martin Keller, M.D., NIMH, 2000-2004, \$4,205,195. This R01 is a multi-site, longitudinal, prospective investigation of the course and outcome of anxiety disorders.

Role: Co-Investigator Maria Pagano, Ph.D.

Achievements: wrote sections (power analysis, preliminary studies) of awarded continuing grant; constructed hierarchical models and wrote results sections of 6 publications and 4 national presentations; led project initiative in the analysis and publication of results regarding the impact of fluctuating conditions (stressful life events, medication use) on remission and relapse of anxiety and alcohol use disorders.

“Prospective Study of Body Dysmorphic Disorder”. PI Katharine Phillips, NIMH, 2000-2005, \$2,526,916. This R01 is a naturalistic, longitudinal investigation of the course of body dysmorphic disorder among young adults and examines risk factors associated with BDD remission and relapse.

Role: Senior Statistician Maria Pagano, Ph.D.

Achievements: conducted hierarchical modeling for 10 publications and 3 national presentations that addressed project’s primary aims; identified protective factors (prosocial behaviors) increasing the likelihood of BDD remission; wrote software program to identify partial remission states of BDD that was sought out by other investigators to capture partial remission states of OCD and anxiety disorders.

“Longitudinal Study of Obsessive Compulsive Disorder”, PI Steven Rasmussen, NIMH, 2000-2005, \$2,400,120. This R01 is a multi-clinic, longitudinal investigation of the course of obsessive-compulsive disorder (OCD) with a focus on symptom severity, treatment utilization, and quality of life over time.

Role: Co-Investigator Maria Pagano, Ph.D.

Achievements: conducted hierarchical linear modeling for 3 primary papers and 2 national presentations addressing symptom severity of OCD, the impact of OCD on quality of life, and distinguishing symptoms of OCD versus obsessive-compulsive personality disorder; effect size estimates of published findings used in the planning of an awarded extensional grant.

“Primary Care Anxiety Disorders Program”, PI Martin Keller, Pfizer Foundation, 1997-2005, \$3,126,282.

This is a longitudinal, prospective investigation of medical and psychiatric comorbidity, psychosocial functioning, and socioeconomic impact of anxiety disorders among primary care patients.

Role: Co-Investigator Maria Pagano, Ph.D.

Maria Elizabeth Pagano – VITA

Achievements: responsible for generating scientific discoveries of the characteristics and predictors of generalized anxiety disorder, a primary project objective; conducted time series analyses with autocorrelation estimation and wrote results sections of 5 publications and 12 national presentations.
